

Experienced Developer, Full-Stack js + Java EE

Our Startup Unitag is looking for an experienced developer to develop and maintain its QR code generation platform.

Unitag is expert in digital marketing, specializing in Offline To Online.

Communication professionals can use our services including QR Code to offer a digital experience (quiz, survey, discount coupon) to their customers.

Unitag generates 2 million Qr codes each year, 1500 customers (35% internationally).

We support brands such as Séphora, Michelin, The French Army, Crédit Agricole or Pierre-Fabre.

As precursors to the customization of QR codes, Unitag wants to continue to establish itself as a reference for innovation in the field of QR Codes and Offline To Online marketing tools.

Job Description

Following its acquisition in 2017, our startup Unitag has change strategy and strengthened its development potential. In a team of 6 highly motivated people, you will work closely with the product owner to define changes, improvements and new areas of development. You will manage the production and development platform already in place.

This position requires a great experience to be able to quickly take over the existing, maintain it and be able to develop as quickly as possible new features.

Skills

- Back-end (Java EE, NodeJs)
- Front-end web technologies (AngularJS, React...)
- Knowledge of systems like NoSQL and Agile methods
- Open, responsive and dynamic, you enjoy teamwork and have a great sense of commitment.

Location : Toulouse, **@ekito**

Type of contract : CDI
